

# Waste Minimization Guidelines

The following guidelines form the basis of the  
EcoSchool Waste Reduction EcoReview:

## Reduce

1. **Paper use** by photocopying on both sides of paper whenever possible;
2. **Paper use** by using a sibling list when sending printed information home to parents;
3. **Food-related waste** by implementing a waste-free or boomerang lunch system.

## Reuse

4. **Paper** by organizing a "Reuse" Box for half-used paper that can be used for rough work, lists and art projects;
5. **Mugs, glasses, plates and utensils** to avoid using disposable dishes as much as possible;
6. **Furniture and equipment** by advertising unwanted items internally within the Board.

## Recycle

7. **All paper products** using a blue box recycling system set up in all classrooms and offices;
8. **Cans, glass and plastic bottles, drink boxes and milk cartons** using a container recycling system set up in locations around the school.
