Explanation of Terms and Categories

First-Time Eligible students entered Grade 9 during the 2001-2002 school year. These students (and any others who were placed in this cohort) were required to write the OSSLT for the first time in October 2002. To meet the requirements of an Ontario Secondary School Diploma students must successfully complete both the reading component and the writing component. Schools are responsible for indicating which component(s) the student still requires in order to complete the OSSLT successfully.

Previously Eligible students entered Grade 9 during the 2000-2001 school year. These students (and any others who were placed in this cohort) were required to write the OSSLT for the first time in February 2002. Students who were not successful in February 2002 or were absent or deferred became eligible again to write the OSSLT in October 2002. To meet the requirements of an Ontario Secondary School Diploma students must successfully complete both the reading component and the writing component. Schools are responsible for indicating which component(s) the student still requires to successfully complete the OSSLT.

These groups are reported separately to allow schools to compare cohorts from year to year. Tracking cohorts in this way also enables schools to assess the effectiveness of literacy programs and other strategies for remediation.

Successfully Completed the OSSLT: Students participated in the OSSLT and passed both the reading component and the writing component.

Wrote the OSSLT But Were Not Successful: Students participated fully in the OSSLT but did not pass either the reading component or the writing component, or both. Unsuccessful students are reported in one of the three following subcategories:

- Passed Reading Only
- Passed Writing Only
- Did Not Pass Reading or Writing

Number Fully Participating in the OSSLT: Students are designated as having fully participated if they were present on both days of the administration. A student is considered to be present for a day's testing if there was work completed in at least one of the two booklets administered on that day, or if the student is reported as present on the Student Tracking Sheet (STS).

Absent One or Both Days: Students who were absent on either day are included in this category. Note that a student is not considered absent from a day's testing if there was work completed in at least one of the two booklets administered on that day, or if the student is reported as present on the STS.

Deferred: Students can be deferred under several circumstances, as outlined in EQAO's *Guide for Accommodations, Special Provisions, Deferrals and Exemptions*. A student is categorized as deferred only if the Student Information Form (SIF) indicates a deferral and there is no work in any of the student's test booklets. If a student completed any portion of the OSSLT, he or she is not categorized as deferred. If the SIF indicates that a student is

Total First-Time Eligible Students: All students in the cohort who are working toward an Ontario Secondary School Diploma (OSSD) are referred to as eligible students. This category includes all participating students as well as those categorized as deferred or absent; it does not include exempt students.

Exempt: Students can be exempted from the OSSLT if they are not working toward an OSSD. A student is categorized as exempt only if the SIF indicates that the student is exempt and there is no work in any of the test booklets. Note that if a student completed any portion of the OSSLT, he or she is not categorized as exempt.

Method 1: This method provides a percentage breakdown of all students in the cohort who are working toward an OSSD. The only students excluded from the percentages in Method 1 are those who were not working toward an OSSD and were, therefore, exempted.

Method 2: This method provides a percentage breakdown of those students who fully participated in the OSSLT. Students are considered to have fully participated if they were present on both days of the administration.

Protection of Personal Information

To protect against the disclosure of personal information associated with individual student results, a series of suppression rules are implemented for the public release of OSSLT results. Statistics have been suppressed where the number of respondents is so low that individual results could be determined from the aggregate value.

Percentages are rounded to the nearest even integer. Percentages of less than 0.5% are shown as <1%.

School Results for First-Time Eligible Students (Method 1)

| | Provincial Results (#=146 539) | Board Results (#=6 575) | School Results (#= 233) |
