## ***CONSERVE FIRST*** NET ZERO RESEARCH STUDY

*The Research in Architecture Studio*

for the

Toronto Catholic District School Board

9 October, 2019

9 October, 2019

**Toronto Catholic District School Board**  
80 Sheppard Ave., East  
Toronto, ON M2N 6E8

Attention: **Ms. Shirley Sederavicius**  
(Acting) Senior Manager, Capital Development, Facilities Services

Dear Shirley,

I am pleased to provide the final *Conserve First, Net Zero research study* report. Thank you and your team for the trust you've given me. While many questions remain, I sincerely hope the ideas and observations that are contained in these pages will serve the Board well, in the coming days and years.

With my best wishes,  
**The Research in Architecture Studio**

Barbara M. Ross  
Principal

cc: *Deborah Friesen, Acting Superintendent of Capital Development and Renewal*  
*Morris Iafrate, Senior Co-ordinator, Renewal, Facilities Services*  
*Khaled Elgharbawy, Senior Co-ordinator, Maintenance & Energy Management, Facilities Services*  
*Lyn Northey, Senior Manager, Capital Development, Facilities Services*

## Table of Contents

	<i>page</i>
<b>Executive Summary</b>	1
<b>Introduction: What would “Net Zero” mean for the TCDSB?</b>	37
What is a “Net Zero” school?	39
Key metric: Energy-Use Intensity (EUI)	46
<b>Part 1, Starting position and guiding principles</b>	51
Walking with our values	53
Guidance from the 2015 Encyclical <i>Laudato Si’</i>	54
Benchmarking energy use in elementary and secondary schools	59
Comparison of the TCDSB’s portfolio to others in the GTA	84
On renewable energy	90
Part 1 Summary: How long is the journey? How shall we travel?	96
<b>Part 2, Regulations, Standards, and Conservation culture</b>	111
<i>Ambitious</i> conservation in context	113
Regulations that apply in Toronto, Today	114
Toronto’s framework for tomorrow	118
Voluntary programs and guidelines	126
Conservation Culture: how Ontario’s most-conserving boards walk the walk	134
Part 2 Summary: Options to help navigate a changing context	136
<b>Part 3, Cold-climate “Net Zero” schools: the few and the new</b>	145
Our search for reliable evidence of a “Net Zero” operation	147
Schools in the GTA: Ambitious conservation, yes - Net Zero, not yet	148
Schools elsewhere in Ontario: proven Net Zero is still extremely rare	154

## Table of Contents (continued)

	<i>page</i>
Net Zero buildings emerging in Ontario and Québec	162
Net Zero schools in the USA's cooler climates: very few and somewhat new	163
Part 3 Summary: Walking forward as things change	172
<b>Part 4, "Conserve first" demands a whole array of design strategies</b>	<b>179</b>
Components, arrangement and quality control: essential design strategies	181
The building enclosure: walls & windows, the roof & the floor	184
Air-tightness testing	187
Lighting and passive strategies	190
Heating & cooling equipment strategies	192
Part 4 Summary: No magic bullet	194
<b>Part 5, Financing the transition toward Net Zero readiness</b>	<b>201</b>
Moving forward in an era of financial constraint	203
The capital cost of the Net Zero case studies	204
Capital cost impacts	206
Operating cost impacts	210
A challenge posed by utility rates in Ontario today	214
Energy-conservation capital fund	216
Part 5 Summary: Challenges and opportunities in financing Net Zero	218
	<b>Appendices</b>
Appendix 1: Benchmarking of the TCDSB portfolio (supplement to Part 1)	223
Appendix 2: Cost analysis (supplement to Part 5)	235
Appendix 3: Lists of Illustrations, Abbreviations, and Resources	241
