

(K-2) Week 4: Working Together

Continue your journey of learning over the summer.
You can choose to explore as many activities as you wish each week.
Challenge yourself to at least 3 in a row- just like playing Tic Tac Toe!

Community Helpers

Identify some services and service-related occupations in your community. Make a list. Talk about how they meet people's needs.

Listen to the book "[Whose Hands Are These](#)" and see how many helpers you can guess! How many of the helpers from your list appeared in the book?

Building Perspectives

Build a simple figure out of blocks or lego. Challenge a friend or family member to do the same.

Draw the figure from different points of view; try the front view, the side view, the back view and the top view also known as the Bird's eye view.

Helping Hands

God gave us hands for helping. Trace your hand 5-6 times (or more), then cut them out. On each hand draw or write about how you can show love to a family member, friend or member of your community. You can assemble the hands any way you like. Take a look at some examples [here](#). Be creative!

Gift Exchange

Plants breathe in a gas called Carbon Dioxide (CO₂). When they breathe out, they give us OXYGEN, which is the gas we need to survive. Oxygen also helps improve our mood, reduces stress and increases our energy levels. Find a nice park with a lot of trees where you can give them some CO₂ in exchange for a good dose of oxygen. Bring a book with you or listen to some music while you enjoy nature's gifts to you!

Cup Tower

You will need 2 people to play this game. Your team's goal is to stack the cups without using your hands. Both players must WORK TOGETHER to control the "grabbing" tool made out of a rubber band and 4 pipe cleaners (or 4 pieces of string). [CLICK HERE](#) to learn how to play this game.

Material: 1 rubber band, 4 pipe cleaners (or four pieces of string), 6 plastic cups.

Waste Monitoring

Go on a neighborhood walk with an adult and monitor the number of garbage cans, recycling containers and compost containers in your area. Record your count in a tally chart. What do tally marks look like? [CLICK HERE](#)

Garbage	Recycling	Compost

Try graphing the information into a [bar graph](#)

Cards for Community

Card games are often a time for friends and family to gather and play together. It can also be a great time to practice Math skills!

Using a deck of cards, pass out number cards to both players. Each player flips over two cards. Add or subtract the two numbers showing. Players compare values and the player with the higher value wins all four cards.

Try out some more card games [here](#).

I'm a Community Helper!

Community helpers like firefighters, police officers, street cleaners and health care workers help keep our community safe, clean and healthy. But, they also need our help to take good care of our community.

- 1) Make a list or draw a few ways you can help our Community Helpers take care of your community.
- 2) Select one of your ideas and put it into action.

Move like a Superhero!

Ready for some superhero action? Help your family stay fit and have a great time by learning the Spiderman dance. It's time to shake off your cobwebs! [CLICK HERE](#) to watch this video and practice some cool dance steps together as a family!
