

Special Education Program Overview and Improvement Planning

Exceptionality: Autism
Placement: Regular Class with Resource Assistance

A. Definition:

The Ministry of Education defines Autism as:

“A severe learning disorder that is characterized by disturbances in rate of educational development, ability to relate to the environment, mobility, and/or perception, speech and/or language; or lack of the representational symbolic behaviour that precedes language. “

In the TCDSB, a diagnosis of Autism Spectrum Disorder is required for an identification of Autism. The basis of diagnosis is DSM-V, which includes the following characteristics:

- Persistent deficits in social communication and social interaction across multiple contexts
- Restricted, repetitive patterns of behaviour, interests, or activities
- Symptoms present in the early developmental period
- Symptoms cause clinically significant impairment in social, occupational, or other important areas of current functioning
- Symptoms are not better explained by intellectual disability (intellectual developmental disorder) or global developmental delay¹

If the assessment is from a medical or psychology practitioner from the community or other school board, a **Psychology File Note by TCDSB psychology staff may be required** indicating that the student meets TCDSB identification criteria.

If other diagnoses are also present, each exceptionality will be identified separately, as per TCDSB and Ministry of Education criteria.

If no assessment has been completed, Autism is not proposed and a referral for appropriate assessment(s) will be recommended.

¹ DSM-V

B. Placement options:

- Indirect Support
- Regular Class with Resource Assistance**
- Regular Class with Withdrawal Assistance
- Special Education Placement with Partial Integration – Intensive Support Program (ISP)
- Full-Time Special Education Placement

B. Description:

For a student with a diagnosis of Autism, Regular Class Placement with Resource Assistance refers to placement in a regular class for most or all of the day and s/he receives specialized instruction, individually or in a small group, within the regular classroom, from a qualified Special Education teacher.

Individualized educational programming in elementary and secondary schools for students with a diagnosis of Autism is provided in their areas of need, and where appropriate, across the curriculum through the application of appropriate accommodations and modifications to provide access to the Ontario curriculum, as documented in the IEP. Alternative programming may also be provided in the student's areas of need that are not part of the Ontario Curriculum in areas such as social skills, self-regulation, sensory differences, life skills and communication.

Program development is also consistent with PPM 140 requirements – individualization in program planning, use of positive reinforcement, data collection and analysis to inform programming, programming for generalization of skills, attention and transitions.
