Synchronous and Asynchronous learning is learning that occurs at home.

- **Synchronous Learning** is at home online learning that occurs when the teacher interacts with a student or group of students in real-time either online or through other means in relation to the course content, lessons, or assessment tools.

- **Asynchronous Learning** is at home learning where students respond to course content, lessons, or assessments typically through accessing the learning platform where the teacher has placed activities. Although this can seem to look like independent work, ideas, response and feedback can still occur. The feedback does not happen simultaneously with the teacher.
