

**STEP 1**

**Individual develops symptoms**

- Call site to notify
- Arrange pick up of saliva kit

**STEP 2**

**Non-symptomatic caregiver picks up saliva kit package**

- Package contains saliva container, lab requisition, label, instructions for collection and how to access results

**STEP 3**

**Individual completes saliva test**

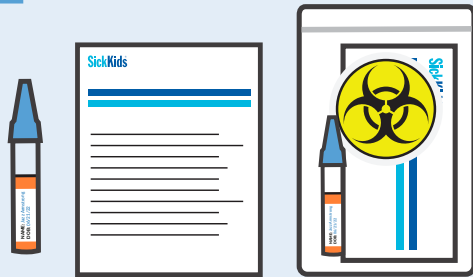

- Nothing by mouth (eating, drinking etc.) 30 minutes prior
- Complete test at home

**STEP 4**

**Drop off sample**

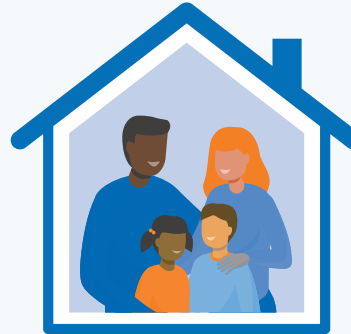

- Ensure specimen is labelled and lab requisition filled in completely

**STEP 5**

**Individual follows current isolation guidelines**

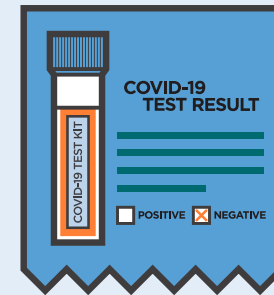

- Wait for test result

**STEP 6**

**Accessing results**

- Available online within 24-48 hours of arrival at SickKids lab

**TEST RESULTS**

**POSITIVE**

- You will receive a call from SickKids and Toronto Public Health (TPH)
  - Continue isolation
  - Follow TPH Guidelines

**NEGATIVE**

- Consult TPH guideline
- Ending isolation is determined by vaccination status and exposure

**UNDETERMINED**

- Result cannot be processed or is indeterminate
  - SickKids Team will call and provide information for retest
