QUAD 4 Starts Monday, April 26, 2021
(more details to follow)

Synchronous and Asynchronous Learning occurs at home.

- **Synchronous Learning** is at home online learning that occurs when the teacher interacts with a student or group of students in real-time either online or through other means in relation to the course content, lessons, or assessment tools.
- **Asynchronous Learning** is at home learning where students respond to course content, lessons, or assessments typically through accessing the learning platform where the teacher has placed activities. Although this can seem to look like independent work, ideas, response, and feedback can still occur. The feedback does not happen simultaneously with the teacher.
