Explanation of Terms and Categories

Receiving Special Education Support: designates students whose Student Information Form indicated that they had been formally identified by an Identification, Placement and Review Committee, as well as students who, though not formally identified, received special education support as noted on their Individual Education Plan.

Exempt: designates students who were formally exempted from participation in one or more components of the assessment.

No data: is used when EQAO did not receive completed assessment booklets from non-exempt students.

NEIS: (Not Enough Information to Score) is used when large sections of work are missing, due to student absence or for other reasons, such that a level of achievement cannot be assigned for a given category, strand or overall score.

NE1: (Not Enough Evidence for Level 1) is used when students have provided enough information to score but have not demonstrated enough evidence of knowledge and understanding to be assigned Level 1.

Levels 1-4: are aligned with the four-level scale used on the Provincial Report Card, which sets Level 3 as the provincial standard.

Explanation of methods

Method 1: Data for all students in the grade are reported. Method 1 expresses the number of students in each reporting category as a percentage of all students in the grade (i.e., students at the four levels of achievement and those in the *exempt*, *no data*, *NEIS* and *NE1* categories described above).

Method 2: An alternative way of presenting the data. Method 2 expresses the distribution of results as a percentage of those students who took part in the assessment (i.e., students at the four levels of achievement and those in the *NEIS* and *NE1* categories described above). Students in the *exempt* and *no data* categories are excluded.

Notes

- Gender differences may not be precise, since gender was not specified on some Student Information Forms.
- Percentages may not sum to 100, due to rounding.
- In reading and writing, the overall level of achievement is calculated using students' scores in the categories and the multiple choice component. In mathematics, the overall level of achievement is calculated using students' scores in the categories and in the multiple choice component.
- Overall scores are adjusted for year-to-year differences between assessments.
