

School Report

Grade 9 Assessment of Mathematics, 2006–2007

School: St Michael's Choir S (834718)

Board: Toronto Catholic District School Board (67059)

I am pleased to provide you with this report on the Grade 9 Assessments of Mathematics for 2006–2007. Included are student results for the current year, those from previous years and, to put these results in context, information about the student populations.

Throughout the province, EQAO data inform professional practice and act as a catalyst for improving student achievement. This report has been designed to assist you in your conversations about improving student achievement and planning interventions for students.

We believe that every student deserves the best outcome from public education. Working with Ontario educators, EQAO continues to design assessments that are directly linked to *The Ontario Curriculum*. These assessments provide a means of measuring student learning at a few critical transition points and are a vehicle for assuring people that, at those points, all Ontario students are being assessed by the same yardstick.

However, large-scale assessment results are just one piece of the picture of how students are doing in our schools. These assessment results should be considered in conjunction with school-based information. As well, regular assessments conducted by a student's teacher should be the primary method of supporting students in their schooling.

I hope this report will help parents, educators and all who support a strong public education system to work together so that all students achieve their fullest potential.

Sincerely,

Marguerite Jackson
Chief Executive Officer

TIPS

The applied and academic mathematics programs are different and should be considered separately.

Note: Students in locally developed programs do not participate in these assessments.

Each school or board is unique. To appreciate the distinctive character of a school or board, look at the contextual information to understand the features and characteristics of the community it serves.

This assessment captures the performance of students at one point in time each year. Consider the results along with other information about students' achievement in mathematics.

Exercise caution when interpreting results for small schools or boards. Results may vary considerably from year to year, and differences may look exaggerated. For example, in a school of 30 students, a difference of 10% represents only three students.

Trends may be difficult to identify or to interpret. This is especially true when groups are small or in schools where there is a high turnover in the student population.

EQAO values students' privacy. Results are not reported publicly for schools where fewer than 15 students participated, because it might be possible to identify individual students.

WHAT IS IN THIS REPORT?

This report shows how well students have met curriculum expectations for either the applied or academic mathematics program to the end of Grade 9. Students complete two booklets that allow them to show what they know in mathematics. The assessment is based on *The Ontario Curriculum: Mathematics, Grades 9 and 10*.

This report includes

- ◆ results for this year;
- ◆ a comparison of results over the past four years to aid in monitoring improvement and
- ◆ information about the characteristics of the students who participated.

Specifically, you will find

- ◆ summary graphs showing the percentage of students achieving the provincial standard in either applied or academic mathematics;
- ◆ detailed tables and graphs showing results for all levels of achievement, participation information and results for gender
- ◆ student questionnaire results and
- ◆ an explanation of all terms used in this report.

HOW TO USE THIS REPORT

- ◆ Examine the contextual information to understand the similarities and differences between this school, the board and the province; the board and the province. Consider the challenges that any differences might present.
- ◆ Examine the school results for applied and academic mathematics.
 - Are these results consistent with what you would expect?
 - How do the school results compare to the board and province; the board results compare to the province?
 - How do these results compare over time? Note that significant revisions were made to applied program courses in 2004–2005 as reflected in *The Ontario Curriculum, Grades 9 and 10: Mathematics* (revised 2005).
 - What influence might students' attitudes have on student performance?
- ◆ Speak to the school principal or the school council chair about the goals for school improvement related to mathematics.

The Education Quality and Accountability Office is an independent agency that gathers information about student achievement through province-wide assessments. Each year, all Grade 9 students in applied and academic mathematics take part in this assessment across Ontario. Individual results are reported to students and to parents and guardians. School, board and provincial results are released publicly.

† Demographic information pertaining to “gender” and “student status” are provided by schools and/or boards through the Student Data Collection process. Some data may be missing because they were not provided by the school.

+ The percentage of students in this group may not be comparable with those of later years as the definition for the ESL/ELD group changed in 2004 from “students enrolled in an ESL/ELD program” to “students designated as ESL/ELD learners”.

++ In 2006–2007, students who were coded “exempt” were placed in the “no data” category. Since this may affect the percentage of students for whom no data is available, the results may not be comparable with those of previous years.

†† Demographic information pertaining to “school background” and “language” are gathered from the Student Questionnaire completed by students. Some data may be missing because they were not provided by the students.

n/a Information not available.

Second-semester course	0%	0%	0%	100%	0%	
Full-year course	0%	100%	100%	0%	0%	
Language and School Background^{††} Based on Student Questionnaire data						
Number of Respondents:		n/a	n/a	n/a	n/a	17
Speak only or mostly a language other than English at home					6%	
Speak another language as often as English at home	Information not available				24%	
Attended three or more elementary schools from kindergarten to Grade 8					47%	

* See the Explanation of Terms.

† Demographic information pertaining to "gender" and "student status" are provided by schools and/or boards through the Student Data Collection process. Some data may be missing because they were not provided by the school.

⊕ The percentage of students in this group may not be comparable with those of later years as the definition for the ESL/ELD group changed in 2004 from "students enrolled in an ESL/ELD program" to "students designated as ESL/ELD learners".

⊕⊕ In 2006–2007, students who were coded "exempt" were placed in the "no data" category. Since this may affect the percentage of students for whom no data is available, the results may not be comparable with those of previous years.

†† Demographic information pertaining to "school background" and "language" are gathered from the Student Questionnaire completed by students. Some data may be missing because they were not provided by the students.

n/a Information not available.

Results over Time, 2003–2004 to 2006–2007

* Because percentages in tables and graphs are rounded, and because graphs do not show all reporting categories, percentages may not add to 100.
 † These percentages are based on the actual number of students and cannot be calculated simply by adding the rounded percentages of students at Levels 3 and 4.
 †† The NEIS category was eliminated in 2004–2005. See the Explanation of Terms.
 ‡ In 2006–2007, students who were coded “exempt” were placed in the “no data” category. Since this may affect the percentage of students for whom no data is available, the results may not be comparable with those of previous years.

Grade 9 Assessment of Mathematics, 2006–2007, Applied Program

STUDENT QUESTIONNAIRE RESULTS FOR THIS SCHOOL (# = N/D)		
Questionnaire Item	Percentage of Students*	
1. Degree to which students “agree” or “disagree” with each of the following statements:		<i>Number of Students Who Answered “Strongly Agree or Agree”</i>
I like mathematics.	N/D	N/D
I am good at mathematics.	N/D	N/D
I understand most of the mathematics I am taught.	N/D	N/D
The mathematics I learn now is very useful for everyday life.	N/D	N/D
I need to keep taking mathematics for the kind of job I want after I leave school.	N/D	N/D
Mathematics is boring.	N/D	N/D
Mathematics is an easy subject.	N/D	N/D
<div style="display: flex; justify-content: space-around; align-items: center;"> <div style="text-align: center;"> <input checked="" type="checkbox"/> Strongly agree or agree </div> <div style="text-align: center;"> <input type="checkbox"/> Undecided </div> <div style="text-align: center;"> <input type="checkbox"/> Disagree or strongly disagree </div> </div>		
2. How “easy” or “hard” students find mathematics questions that deal with the following:		<i>Number of Students Who Answered “Very Easy or Easy”</i>
number sense (e.g., operations with integers, rational numbers, exponents)	N/D	N/D
algebra (e.g., solving equations, simplifying expressions with polynomials)	N/D	N/D
linear relations (e.g., scatter plots, lines of best fit)	N/D	N/D
measurement (e.g., perimeter, surface area, volume)	N/D	N/D
geometry (e.g., angles, quadrilaterals)	N/D	N/D
<div style="display: flex; justify-content: space-around; align-items: center;"> <div style="text-align: center;"> <input checked="" type="checkbox"/> Very easy or easy </div> <div style="text-align: center;"> <input type="checkbox"/> Undecided </div> <div style="text-align: center;"> <input type="checkbox"/> Hard or very hard </div> </div>		

* Percentages may not add to 100, due to a lack of or ambiguous responses. Where there is no number in a box, the percentage of responses is smaller than 4.

Grade 9 Assessment of Mathematics, 2006–2007, Applied Program

STUDENT QUESTIONNAIRE RESULTS FOR THIS SCHOOL (# = N/D)		
Questionnaire Item	Percentage of Students*	
3. Students have the following <i>at home</i> to use for mathematics school work:		Number of Students Who Answered "Yes"
a computer	N/D	N/D
a scientific calculator	N/D	N/D
a graphing calculator	N/D	N/D
<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No		
4. Amount of time students <i>usually</i> spend on mathematics homework (in or out of school) on any given day:		Number of Students
more than 45 minutes	N/D	N/D
between 31 and 45 minutes	N/D	N/D
30 minutes or less	N/D	N/D
mathematics homework not usually assigned	N/D	N/D
5. How often students complete all of their mathematics homework:		Number of Students
never or seldom	N/D	N/D
sometimes	N/D	N/D
often or always	N/D	N/D
6. How often students have been absent from their Grade 9 mathematics class this year:		Number of Students
never	N/D	N/D
one to four times	N/D	N/D
five to nine times	N/D	N/D
10 or more times	N/D	N/D

* Percentages may not add to 100, due to a lack of or ambiguous responses. Where there is no number in a box, the percentage of responses is smaller than 4.

Grade 9 Assessment of Mathematics, 2006–2007, Applied Program

STUDENT QUESTIONNAIRE RESULTS FOR THIS SCHOOL (# = N/D)		
Questionnaire Item	Percentage of Students*	
7. How often students have been late for their Grade 9 mathematics class this year:		Number of Students
never	N/D	N/D
one to four times	N/D	N/D
five to nine times	N/D	N/D
10 or more times	N/D	N/D
8. Language(s) students speak at home:		Number of Students
only or mostly English	N/D	N/D
another language (or languages) as often as English	N/D	N/D
only or mostly another language (or other languages)	N/D	N/D
9. Number of elementary schools (kindergarten to Grade 8) attended:		Number of Students
one or two schools	N/D	N/D
three schools	N/D	N/D
four schools	N/D	N/D
five schools or more	N/D	N/D

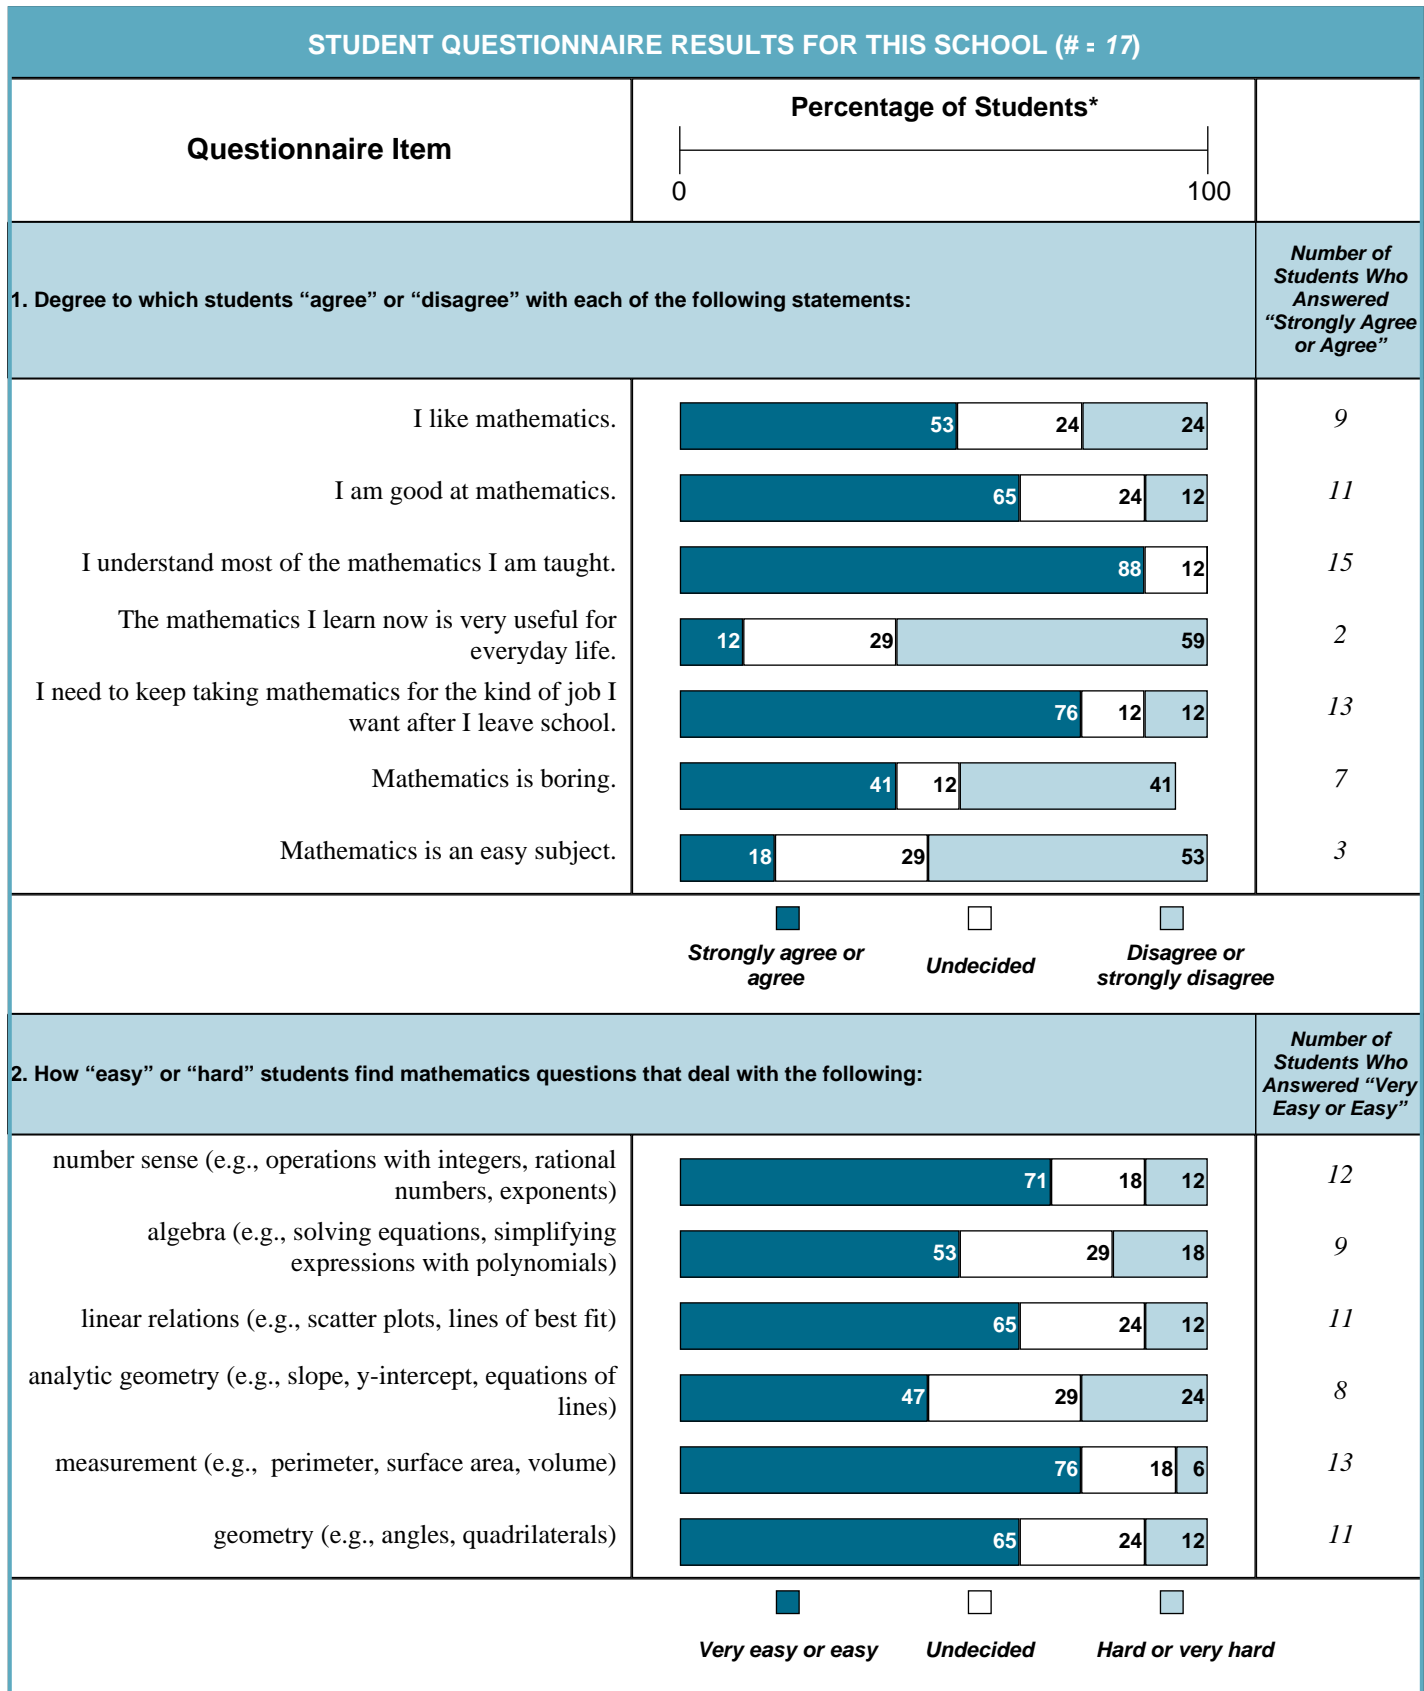

* Percentages may not add to 100, due to a lack of or ambiguous responses.

* Includes only students for whom gender data were available.

EXPLANATION OF TERMS

All Students	Results are reported for all students in the program.
Participating Students	Results are reported only for those students who took part in the assessment (excludes the "no data" category).
Provincial Standard	The Ministry of Education, in <i>The Ontario Curriculum, Grades 9 and 10: Mathematics</i> , has set Level 3 as the provincial standard.
Level 4 (80-100%)	The student has demonstrated a very high to outstanding level of achievement. Achievement is <i>above</i> the provincial standard.
Level 3 (70-79%)	The student has demonstrated a high level of achievement. Achievement is <i>at</i> the provincial standard.
Level 2 (60-69%)	The student has demonstrated some of the required knowledge and skills. Achievement is <i>below, but approaching</i> , the provincial standard.
Level 1 (50-59%)	The student has demonstrated a passable level of achievement. Achievement is <i>below</i> the provincial standard.
Below Level 1	The student has not demonstrated sufficient achievement of curriculum expectations (below 50%).
NEIS	"Not Enough Information to Score" is a category that was eliminated in 2004–2005. Students now are assigned a level based on the work they submitted, with unanswered questions treated as incorrect.
No Data	Students who did not complete any part of the assessment due to absence or for medical or other reasons.
Exempt	In 2006–2007, students who were coded "exempt" were placed in the "no data" category.
ESL/ELD	English as a second language (ESL)/English literacy development (ELD) are students identified by the school as ESL/ELD learners.
Students with Special Needs	Students formally identified by an Identification, Placement and Review Committee and/or students who have an Individual Education Plan. Students identified as gifted are not included.
N/R	"Not reported" indicates that the number of students participating (fewer than 15 in a group) or responding to the Student Questionnaire (fewer than six in a group) is so small that identification of individual student results might be possible; therefore, results are not reported.
N/D	Used in tables and graphs to indicate that there were no students in the grade or program for the years specified.
